As-built surveys are undertaken to verify that the project has been constructed as per the design or to accurately record and identify any changes.

As-built surveys are mainly (but not exclusively) carried out for the following projects / scenarios:

- Land Registry submission (e.g. updating title plans)
- Retrospective planning approval
- Highways adoption
- Utilities adoption
- For the release of deposits / retention on the submission of an acceptable as-built survey to obtain a completion certificate
- To facilitate the re-design, renovation or extension to existing structures (more commonly known as Measured Building Surveys)

The results of the as-built survey can be presented on a drawing and supplemented with a detailed report if required.

**Please contact us for your individual requirements**
